Find common denominators
Organize hierarchic multi-level structure
Create a link between the first and second level
Only one link to instrument above
Amendments are inherited downwards
Place templates on the first level
Place "real" instruments on lower levels
Give templates one link upwards but unlimited downwards

Fig 4

Find an existing instrument which has at least all of the attributes of the new instrument

Place the new instrument on a level below the existing instrument

Create a link between the new instrument and the existing instrument
